How can we make a better decision-making system for society?

About Your Cascadia (aka OurCadia)

Our goal is to build a Cascadian Economic Direct Democracy – a parallel economic overlay that is under the complete direct democratic control of local community members via intuitively recognizable systems of organization.

It aims to empower every person to sustainably exchange goods and services, drastically increase personal income, fund new jobs and needed causes, have an equal voice in their locality; and make educated, horizontal, community-based decisions with a transparent, secure, and ever-improving open source platform.

Our collaborative revolution starts with you.

What kind of platform?

This is the homepage! It’s fully customizable

My Initiatives

- New cause - Neighborhood Cleanup: 62.4%
- New cause - Native water fund: 37.7%
- Change request - Add "Charity Champ" badge: 50%
- Change request - Local currency to gold standard: 22.1%
- Change request - Add new service category: "Custodial": 78%
- Informational brief - Water bill statement: 68%

* Start new Initiative
Community-based budgeting of Universal Basic Income excess, consisting of dollars and self-stabilizing crypto-tokens.

My ideal community budget

- Education: 23.5%
- Health Services: 19.2%
- Environment: 11.4%
- OurCadia Admin: 5.3%
- Arts Programs: 4.2%
- Business Loans: 36.4%

Explore other solutions in need of funding:
- Kraftz 4 Kiddoz: 0.8%
- Claymation 101: 0.45%
- Inner city restoration: 1.55%
- Films in the Park: 0.9%
- Cello instructors: 0.5%
The things you need and want will populate in a prioritized list here based on distance and responsibility scores.

You can also sort by other filters, or idly browse random offers/needs nearby.
What you got here is your quintessential crescent wrench. It can handle nuts of any size and strength (provided they are between 0-5" in diameter and fastened within reason), backed by a lifetime Daftsman™ warranty. Pretty standard issue, really.

If that’s not enough for you, this was used literally one time when I couldn’t find my other twelve crescent wrenches. So needless to say, I don’t really need this one, and it’s in perfect condition still. You save like 7 bucks off store-bought, which is also about the price I charge to deliver (within a 40 mile radius). Or you can pick it up. Long distance shipping available for 40+ miles away as well. BTC/ETH/LTC accepted.

This is also part of the Wikitree, in a section that defines meta-decisions about how members want the platform itself to operate and grow.

It states some community goals, and potential rewards to unlock for different scales of operation.

When communities are large enough, they can test variations of rules and structures, and measure/compare the results to adapt and improve.
Gamified Incentive Systems

This is your personal mission control, listing all of the achievements you can complete to earn special badges.

Some badges:
- Upgrade your XP meters
- Give you new abilities
- Can be equipped for certain bonuses
- Give you new skins and mini-games.

Fire damage

Fire damage in the Columbia River Gorge and surrounding areas is a real problem for the wildlife, people, and economies that surround it. As of now, there are 2,431 acres reported as actively on fire, and 7,235 acres damaged.

There are 3 types of solutions currently put forward to address fire damage-related problems, and 14 organizations working on getting them put into place.
Welcome to Your Cascadia (aka OurCadia)

We are a growing community in the Pacific Northwest that aims to better ourselves and the world around us with smarter, responsible trade facilitated by continuously optimizing direct democracy.

Our cooperative revolution starts with you.

How can you help? 😊

- Give honest and constructive feedback
- Become an active member (pilot/post-launch)
- Get people hyped by sharing this info with others
- Help with the framework development
- Make and distribute promotional materials
- Participate in debate for an initial Democratic Wikitree
- Donate monthly to help finance the initial effort
- Almost literally anything you can imagine!
Acknowledgments:
Special thanks to these three pioneers, whose ideas make this possible:

• LEDDA – Local Economic Direct Democracy Association
  A system devised by Dr. John Boik. More info here >

• LETS – Local Exchange Trading System
  A system designed and executed by Michael Linton
  More info here >

• Ethereum – A blockchain framework conceived and created by Vitalik Buterin
